

APPENDIX I

DOCUMENTATION
OF TRIBELET BOUNDARIES,
LOCATIONS AND SIZES

extracted from
San Juan Bautista Mission records
by Chester D. King

The following data are abstracted from the Books of Baptisms and Deaths of Mission San Juan Bautista and supplemented with abstracts taken by Clemence (See Merriam 1967) of Missions San Carlos and Santa Cruz and notes by myself from Soledad and provide documentation pertinent to Chapter III and Map 7. The numbers preceding each notation refer to the number given each tribelet in Table 1, which enumerates baptisms from each group.

1.0 - 11.0 - include "Tribelets" which were mainly baptised at Mission San Juan Bautista prior to 1808

1.0 Guachirron - This group seems to have been located at a village near the beach (identified as probably near Castroville) and in a village in the mountains. The main village in the mountains has many relationships with the Pagsines to the east.

1.1 Guachirrones-Pagsines. One village named in records
Sierra Yulanuma 1798 (3)

1.2 Una Rancheria inmediata a los Pagsines llamada Chaone 1801 (3)

1.3 Playa Tularena inds - Todos de la Rancheria de los Tulares llamada comunmente de las Guachirrones - 1800 (4) - probably of the beach - de la rancheria de los Hunerines (see Calendarruc - 2) 3.0)

ra^s not located

1.4 ra de Guachirrones Delmecor

1.5 ra de Guachirrones Cuarto

Besides the baptisms at San Juan Bautista, Guachirrones were baptised at Soledad and San Carlos. The records from Soledad are probably for Guachirrones of the mountains and those at San Carlos are mainly for Guachirrones of the coast.

Soledad - village names

1.6 Uinat de los Guachirrones Guinat, Umunt
1.7 Upaan - 1802(2) del rumbo San Juan
del Chalon ó Guachorróna 1804 (1)

At San Carlos Guachirron, Calendarruc and Pagsin are grouped together. The following are probably Guachirron:

1.8 Culul - en Kalenda-Ruc - cerca del Rio de Monterey en paraje llamada las Salinas - 1787(1), 1789(4)

Lucuyusta - en Kalenda-Ruc 1789-1806(24) - see 10.12
Pagchin - en Kalenda-Ruc 1789-1796(18)
Guachirron ó Calendarruc - 1788-1806(7)

See also Tibuta en Calendarruc - 3.2

- 2.0 Motsum - This group was evidently located to the west of San Juan Bautista and was the closest group to the mission. The mission of San Juan was evidently located in the territory of the Motsumes.

Clemence abstracts, San Carlos - Motsum - en las lomas de la Natindad entre el rio Monterey y el rio de Pajaro.

Libro Defunctos San Juan - 1802(1) - #135 - en la ran-
cheria de los Motsumes á las dos leguas de la Misⁿ

- 2.1 At San Juan during 1797 most neophytes were baptized by village. The main village of the Motsumes was Risca. Risca - 1797(44), 1798(12).

- 2.2 The only other rancheria which can be identified as belonging to the Motsumes is Gexextac or Glesestac - relatives at ra de los Pagsines
1798(2) ra Glesestac
1800(1) en la rancheria Gexextac
1793(1) Pagsin de rancheria Xiristac
1800 Moco - capitan de esta nacion

- 3.0 Calendarruc - This group was evidently centered in the area of Watsonville. The following data are relevant to locating this group.

San Juan Libro Bautismos
1802(1) Calendarruc - en la rancheria llamada de los Corralitos
1803(1) (see landgrant of Corralitos in Watsonville area)

San Juan Libro Difunctos - #160 - 1802(1) - baut #184 - en la rancheria de Calenda rue al poniente (west) de esta Misⁿ de San Juan Bautista

Three villages can be tentatively identified as Calendarruc.

- 3.1 San Juan - Hueneren - de la rancheria de Calendarruc (see also Guachirron)
- 3.2 San Juan - ra de Calendarruc Tiguta 1798(1), 1799(2)
- 3.3 San Juan - ra Teharun 1798(2)

Of the baptisms at San Carlos the village of Tiubta is probably the equivalent of Tiguta. Possibly other rancherias listed under Guachirron (#1) are Caldarruc villages.

San Carlos - Tiubta - 1789-1797(15) - see 3.2.

Baptisms of Calendarruc people were probably done at Mission Santa Cruz - not all Santa Cruz villages can be located and some of these villages may have been in Calendarruc.

- 4.0 Unijaima - The main village of the Unijaimas is clearly the same as Carnedero and is the village near the present town of Carnedero south of Gilroy, at which Font counted 20 houses in 1776. The land grant of Las Animas was perhaps named after the Unijaimas.

The following data is relevant to locating the Unijaimas:

San Juan Libro Bautista - 1800(16) - Todos son Unijaimas de la Rancheria del Carnadero.
1804(3) - en la rancheria de la Brea o Unijaimas.
San Juan Libro Difuncto - 1800(1) - en la rancheria de los Unijaimas ó Carniadero.

- 4.1 The village of Tipisastac is evidently the main village of the Unijaimas since many people from this village are related to individuals from Unijaima.

Tipisastac - 1797(12), 1798(3). Santa Cruz - Sitectac - paraje de San Francisco Xavier - 1804(10) - Tipisastac. See other paraje de San Francisco Xavier 12.0.

- 4.2 The village of Teboaltac is probably a Unijaima rancheria - Teboaltac 1797(1) - de padres Teboaltac de la rancheria del mismo nombre.

1808 ra Teplectac de Unijaima de nacion Teplectac.

- 4.3 Thithirii is also possibly a Unijaima rancheria - 1798(11) - relatives at Unijaima. Santa Cruz - Thirtiru, Tirtiris, Thirtiru - 1802(11).

- 5.0 Ausaima - The Ausaima group can be identified as holding the area included in the land grant of Ausaimas of San Felipe and probably included most of the Pacheco Creek drainage. (See also Cook 1960:248).

The village of Poitoquir was evidently the main village of the Ausaima since most people from this village were related to individuals identified as Ausaimas.

- 5.1 San Juan Libro Bautisto. Poitóquir - 1797(8), 1798(7) - San Carlos Poytouis en Ausayma near Pajaro River - near Mutsun - (3). Merriam states - great rancheria that stood in the plain of San Felipe - Fathers erected a chapel there and a cemetery.
